

Introduction

Rapid urbanization has brought about migration of rural population to urban settings in search of food and job. Prevailing high disparity between rich and poor has forced this migrant population to settle in the small groups in unauthorized colonies called J.J.Clusters. Poverty, sub-human conditions, poor quality of life and lack of medical facilities has resulted in higher incidence of diseases. Today about 35% of Delhi population is living in the J.J.Clusters and unauthorized colonies. Civic bodies are not able to provide required civic amenities as they are all settled in the area labelled as unauthorized. Newly formed Government of Delhi took a serious note of poor health status of residents of J.J.Clusters and decided to strengthen Mobile Health Scheme to provide basic health care to the residents at their door-step according to their felt needs. To start with a fleet of 20 mobile dispensaries was launched covering different J.J. Clusters all over Delhi on weakly basis in 1989. Due to paucity to resources and keen interest shown by some NGO's Delhi Government invited NGO sector to participate in the scheme and as a result, a fleet of 90 mobile Dispensaries started providing health care to the J. J. Clusters / unserved areas / construction sites. Directorate of Health Services realizes that no amount of drugs and curative care provided to J.J.Clusters can control their pathetic condition until or unless other sectors also contribute with DHS to improve overall physical quality of life. From June 2014 involvement of NGO has been discontinued as per the decision taken by Govt. of NCT of Delhi. At present numbers of Mobile dispensaries are 43 only being managed by the staff of Directorate of Health Services.

As a result, the present status of Mobile Health Scheme is as follows:-

1. Mobile Health Scheme has been strengthened to a fleet of 43 mobile vans to provide basic health care to J J cluster / unserved areas / construction sites.
2. Mobile Health Scheme is participating in the implementation of all the relevant health programs like family welfare, immunization etc.
3. Mobile Health Scheme is providing medical cover to thousand and lakhs of people attending religious and social get together like Kanwar Sewa, Sant Nirankari Sammelan, Urs, Haj pilgrims, Republic Day celebration etc.
